ABOUT ME

Computer Engineering undergraduate with a strong foundation in Python, SQL, Machine Learning, and software development. Experienced in developing practical projects involving AI/ML concepts, database management, full-stack development, and problem-solving. Hands-on experience with MySQL, MongoDB, Node.js, JavaScript, Git/GitHub, and development tools such as Google Colab and PyCharm. Interested in building data-driven and intelligent software solutions while continuously learning new technologies and applying technical skills to real-world problems.

SKILLS

- Programming: Python, Java, C++, JavaScript
- AI/ML: Machine Learning, Deep Learning, NumPy, Pandas
- Web: HTML, CSS, Node.js, REST APIs
- Database: SQL, MySQL, MongoDB
- Tools: Git, GitHub, Google Colab, PyCharm, VS Code, Postman

DESIGN TOOLS

- Git
- GitHub
- VS Code
- MySQL , MONGODB Database
- Google Colab
- PyCharm
- Postman
- phpMyAdmin
- MS Excel , powerpoint, word

EDUCATION

BE Computer Engineering

Current Year: BE
last sem CGPA: 9.48

HSC Maharashtra board

Score: 84%

SSC Maharashtra Board

Score: 93%

EXPERIENCE

SOFTWARE DEVELOPER INTERN

june 2026 - aug 2026

Cloud counselage pvt. ltd

- Worked on the design, development, testing, and deployment of a full-stack web application.
- Gained hands-on experience in frontend and backend development.
- Worked with database management and data integration.
- Gained practical experience in application testing and deployment.
- Applied software development concepts to build a real-world project.
- Strengthened debugging, testing, database management, and application deployment skills.

PROJECTS

MEDAGENT AI – AI-BASED HEALTHCARE DECISION SUPPORT SYSTEM | ONGOING

- Developing an AI-based healthcare decision support system integrating Machine Learning, Deep Learning, Computer Vision, and Multi-Agent AI.
- Working on a multimodal approach to analyze medical images, laboratory reports, patient history, and clinical information.
- Exploring AI-based methods for generating diagnostic suggestions, risk predictions, and personalized treatment recommendations.
- Applying Machine Learning and Deep Learning concepts to address complex healthcare-related problems.

COLLEGE SEARCH PLATFORM

- Developed a full-stack web platform to help students search, filter, compare, and explore college information.
- Designed and managed a MySQL database containing structured college information such as courses, fees, seats, marks, and location.
- Developed backend functionality and integrated database operations for efficient data retrieval and filtering.
- Implemented search, filtering, college comparison, and personalized guidance features based on user requirements.
- Used Git/GitHub for version control and deployed the application for online access.
